1 System Requirements

In order to run spim you need to install and do followings;

- ▶ Install Flex and Bison.

- ▶ include exceptions.s file into the "usr/share/spim" directory.

- ▶ include "-std=c++11" flag into makefile in line number 107(CXXFLAGS).

2 Running Spim

You can run kernel files with following steps;

- ▶ add required files into source folder

- ▶ run make command

- ▶ then run ./spim -file "SPIMOS_GTU_1.s"
